

Awan Credit Underwriting Journey

1. Application Submission (LOS)

- Customer submits application + required data
- LOS performs automated eligibility checks
- Case moves into Credit Underwriting Queue

2. Assignment to Underwriting Specialist (Always First Reviewer)

- ALL cases, regardless of amount, start with the **Underwriting Specialist**.
- System displays full applicant data, scoring results, caps utilization, flags, and risk indicators.
- The Underwriting Specialist performs full credit review and selects one of the following:

Actions allowed for Underwriting Specialist

Action	Condition
Approve	Only if loan amount $\leq$ SAR 100,000 AND Sector Cap $<$ 80% AND Score Cap $<$ 80% utilization
Reject	If ineligible or risk unacceptable
Downgrade	If lower amount/tenor needed to fit the risk profile
Recommend / Escalate	If amount $>$ SAR 100,000 OR Specialist requires a second-level review OR Sector Cap $\geq$ 80% OR Score Cap $\geq$ 80%

System Logic at Specialist Stage

- If loan amount $>$ Specialist DOA $\rightarrow$ **Approve is disabled**
- If **Sector Cap $\geq$ 80%** $\rightarrow$ **Approve disabled**, mandatory escalation to CRO
- If **Score Cap $\geq$ 80%** $\rightarrow$ **Approve disabled**, mandatory escalation to CRO

System only allows **Reject / Downgrade / Recommend-Escalate**.

3. Escalation to Head of Underwriting (HoC)

- Cases escalated from the Specialist are automatically assigned to the **HoC**.
- HoC reviews the full credit file, scoring results, sector/scoring cap status, risk flags, and Specialist comments.

HoC Escalation Triggers

- Amount $>$ SAR 100,000
- Specialist escalation

- DOA exceeded
- **Sector Cap $\geq 80\%$**
- **Score Cap $\geq 80\%$**

Actions allowed for HoC

Action	Condition
Approve	Up to SAR 350,000 AND Sector Cap $< 80\%$ AND Score Cap $< 80\%$
Reject	If credit risk unacceptable
Downgrade	Within DOA
Recommend / Escalate	If amount $>$ SAR 350,000 OR Sector/Score Caps $\geq 80\%$

System Logic at HoC Stage

- If loan amount $>$ HoC DOA $\rightarrow$ **Approve disabled**, mandatory escalation to CRO
- If **Sector Cap $\geq 80\%$** $\rightarrow$ HoC **cannot approve**, escalation to CRO
- If **Score Cap $\geq 80\%$** $\rightarrow$ HoC **cannot approve**, escalation to CRO

System only allows **Reject / Downgrade / Recommend-Escalate**.

4. Escalation to CRO/CEO (Final Approval Authority)

Cases exceeding HoC authority OR any case where caps $\geq 80\%$ OR system flags require override are automatically assigned to the **CRO**.

Actions allowed for CRO

Action	Condition
Approve	Up to SAR 500,000 (maximum product limit)
Reject	Always allowed
Downgrade	Allowed

Special Logic (Corrected)

- **SAR 500,000 is the absolute maximum product limit** $\rightarrow$ Above 500K is **auto-blocked** by system.
- If **Sector Cap $\geq 80\%$** $\rightarrow$ **Only CRO can approve**
- If **Score Cap $\geq 80\%$** $\rightarrow$ **Only CRO can approve**
- If caps $\geq 80\%$ $\rightarrow$ System disables Approve for Specialist & HoC

5. Post-Decision System Actions

After decision (Approve / Reject / Recommend):

- LOS stores decision, timestamp, reviewer, and comments in audit log
- LOS generates the consolidated Credit Underwriting Report (popup – TIMAL-2683)
- Approved files move to Operations (Disbursement Review - (Checker))
- Rejected files go to Closed with reasons

6. Handover to Operations (After Final Approval)

Once fully approved:

- Case moves to Operations Officer for disbursement review
- Ops performs Maker/Checker controls
- Ops Manager approves above DOA
- System executes disbursement

Updated Summary Flow (With Sector & Score Caps Logic)

Customer → LOS → Underwriting Specialist

IF amount ≤100K AND Caps <80% → Approve → Ops

ELSE → Escalate → HoC

HoC

IF amount ≤350K AND Caps <80% → Approve → Ops

ELSE → Escalate → CRO

CRO

Final Approval up to SAR 500K

(Caps ≥80% → CRO Only)

(>500K → Auto-Blocked)

→ Ops
